New Curriculum In The UAE
Khalifa Alsuwaidi(PhD)
The National Agenda has set as a target that our students rank among the best in the world in reading, mathematics and science exams, and to have a strong knowledge of the Arabic language.

Education is a fundamental element for the development of a nation and the best investment in its youth.
## First-Rate Education System

Transformation of the current education system and teaching methods

The National Agenda aims

- All schools, universities and students to be equipped with Smart systems and devices as a basis for all teaching methods, projects and research
Mohammed Bin Rashid Smart Learning Program

Shape a new learning environment and culture

- Through the Program, the UAE is investing heavily to bring the latest technology to the schools, encouraging the development of creativity, analytic thinking and innovation. The MBRSLP aims to shape a new learning environment and culture in federal schools through the launch of “smart classes” that will provide every student with an electronic tablet and access to high-speed 4G networks by 2019.

Integration of technology in education

- The Program was launched by His Highness Sheikh Mohammed bin Rashid Al Maktoum, Vice President and Prime Minister of the UAE, in April 2012 and is aligned with UAE Vision 2021 to become a knowledge-based economy through the integration of technology in education.
History

Phase I + II of the Program

- Covered 123 schools and fully implemented Smart Learning techniques with 11,000 students in the 2013/14 school year.
- Phase II of the Program includes 25,000 students from Grade 7 and 8 during the 2014/15 academic year, as well as Pilot Phase for Grade 9 students.

All Schools by year 2019

- With every academic year, the Program will proceed according to a systematic plan to absorb more students and schools until it reaches all UAE government schools.
NEW LEARNING EXPERIENCE

New mode of teaching

Through the integration of technology into the education system. The blended approach combines both traditional methods and technology based techniques that reshape education both inside and outside the classroom. It places the student at the center of the educational experience giving them an element of control and an active role as participants in their own learning process.

To enrich young minds

Technological literacy and technology equipped classrooms allows students to learn in an interactive, engaging and enabling environment in line with the latest advances; the Program is designed to enrich young minds, grow new skills and prepare students to become active contributors in the community, innovators in their respective fields and future leaders.
1– Increasing the confidence of teachers using technology
2– 69% of teachers believe that the program positively impact on learning outcomes
3– 85% believe that the program enhanced the quality of education
4– 78% of teachers believe that the program Increased students' motivation to learn
Education in the UAE 71–2015
