

Postgraduate Diploma in Curriculum Design and Development

Calendar:

Academic Year
2015

Face-to-Face Session:
9-19 March 2015

Supported by UNESCO (IBE, Division of Teaching, Learning and Content [ED/TLC]), the Tanzania Institute of Education (TIE) and Open University of Tanzania (OUT), the Postgraduate Diploma **promotes training and capacity development on curricular issues in Africa within an international comparative perspective**, contributing to the achievement of equitable quality education.

The Postgraduate Diploma is targeted at policy-makers, curriculum developers and specialists, teacher trainers, quality assurance specialists, supervisors, head teachers, teachers, university professors and researchers.

The Diploma is a conceptual and methodological tool for strengthening capacities for curricular analysis, review, evaluation, design and development at all levels of the education system, with an emphasis on the school level.

The Concept of Curriculum...

Curriculum reflects the kind of society to which we aspire

Recognising that there are no effective educational reform processes without a strong vision of Curriculum, to further improve the quality of education, it is necessary to develop a curricular vision that justifies the relevance and pertinence of *what, why* and *how* to teach students at different educational levels, according to a society's expectations and demands.

Curriculum can be viewed as a product (the "what") and a process (the "how"). Both aspects are equally important and complementary. A comprehensive vision of curriculum should include: learning outcomes to be achieved, pedagogical strategies related to teaching and learning processes, teaching materials for teachers and students, disciplinary contents, the assessment of learning outcomes and achievements and management of the curriculum.

On-Site Coordinator:

Angela Katabaro,
Director of
Curriculum Development
Tanzania Institute of Education

Graduate Profile

- Knows, interprets and uses curriculum principles and international trends adequately to analyse compare and evaluate different educational contexts.
- Understands, interprets and promotes the participation of different stakeholders, focusing on curricular change and development processes.
- Designs content and methodologies to be developed at different levels of the education system.
- Values the relevance of curricular change and regularly monitors its implementation and outcomes.

Prerequisites for Participation

- A university degree or qualification in teacher training.
- Experience in teaching, school management, providing pedagogical advice related to educational policies and curriculum development
- Internet access.
- Available to participate in the Online Sessions for 30 weeks.
- Available to attend the Face-to-Face Session (9-19 March 2015).

Postgraduate Diploma in Curriculum Design and Development

Institutional Framework

The Diploma initiative is part of the on-going collaborative effort towards the UNESCO-supported Basic Education in Africa Programme (BEAP), a multi-stakeholder initiative launched in April 2007 to support African countries in expanding and democratising basic education. Through BEAP, international stakeholders' support is required for capacity development in curriculum, teacher education and professional development.

As UNESCO's Institute specialised in curriculum issues, the International Bureau of Education (IBE) implements long-term, sustainable, tailored and accredited capacity development programmes to support quality curricula for all. The first Diploma in Curriculum Design and Development was successfully delivered in Latin America and the Caribbean in 2010, as a joint initiative between the IBE, Catholic University of Uruguay (UCU) and the UNESCO Bureau for Education in Latin America and the Caribbean (OREALC).

Since 2011, Tanzania has been the host country of the Postgraduate Diploma in Africa given its leading role in curriculum reforms in the region, as well as its long-term and in-depth involvement in BEAP.

Teaching Staff

Professors, lecturers and experts in education and curriculum from Tanzania, the East African sub-region, UNESCO and other world regions.

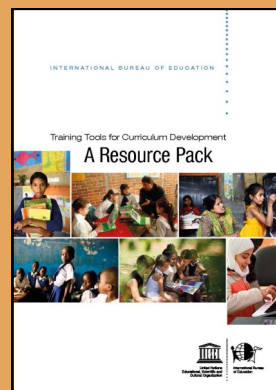

Language of Instruction

Training materials and sessions (both in-person and online) will be delivered in English, French, and facilitated for Lusophone participants.

Training Materials

Participants will receive the **IBE Curriculum Resource Pack** for curriculum development, which contains conceptual frameworks with regional and international comparative perspective, a series of training activities, case studies from different regions around the world on processes of curricular change and development, a glossary of terms, and additional updated resources on curricular trends, issues and approaches.

Topics in the study plan

1. Curriculum development processes
2. Curriculum development trends in the national and international contexts
3. Policy dialogue and formulation for curriculum development
4. Curriculum design approaches and models
5. Curriculum management and governance
6. Development and use of teaching and learning materials
7. Curriculum implementation process
8. Curriculum quality control and assurance
9. Assessment of teaching and learning
10. Curriculum research

Time Requirements

The Postgraduate Diploma is offered on a part-time basis, including a compulsory two-week intensive session (10 days of 8 hours), followed by distance activities over 30 weeks.

A five-week period is allocated to each of the six modules in the study plan. During each module, participants work from a distance through papers, case study reviews and forums. The completion of each module requires submission of two final papers. All participants will be supported by tutors.

The Diploma in Curriculum Design and Development is made possible with the generous support of the Hamdan Bin Rashid Al Maktoum Award For Distinguished Academic Performance.
